DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over DeWinter-Scailteur (SPN 5252537;10/12/93) and Carstairs et al. (USPN 5677019; 10/14/97). DeWinter-Scailteur teaches a process for preserving natural flowers comprising a grid for receiving flowers and several process steps of dehydrating flowers wherein flowers are immersed in solvent, DeWinter—Scailteur teaches an infiltration step wherein flowers are immersed in a bath comprising colorants, solvent and polymer (PEG). See column 1 line 48 – column 4 line 54. DeWinter-Scailteur does not teach the dehydration step comprising alcohol (column 3 lines 1-54). However, Carstairs et al. teaches a process for preserving cut flowers using alcohol. It would have been obvious to one having ordinary skill in the art to modify the invention of DeWinter-Scailteur to include alcohol taught by Ando et al. One would have been motivated to do this in order to promote complete dehydration. With respect to amounts and temperatures one would have been expected to determine the optimum amounts and temperatures. One would have been motivated to do this in order properly dehydrate flowers.

Election Status

Election requirement has been withdrawn.
